~Let's Count! 1~

There are 2 bees. The small bee can carry 2 flowers, and the big bee can carry 3 flowers. They always gather flowers from across the river.

How many times does each bee need to cross the river to bring back all the flowers?

How to count: From hive to flower = 1time, Flower to hive = 1time

<Rules>

The small bee cannot cross alone. The big bee can cross alone.

It's okay if the bees don't always carry the maximum number of flowers.

When there are 10 flowers

When there are 11 flowers

When there are 13 flowers

When there are 24 flowers
